Fax: 416.364.0822

Clinic Information

The Blue Clinic provides short-term medical care to people living with HIV who have temporary or no immigration status and are not eligible for OHIP or the Interim Federal Health Program with the goal of referring them to ongoing affordable care. Our clinic offers expertise in HIV-related treatment and care through the support of experienced staff, including medical doctors, registered nurses, community support workers and peers with lived experience, and service partnerships to deliver holistic and accessible care to patients. Our services include blood tests and lab costs, vaccines and immunizations, specialist reports for the Immigration Medical Exam, connections to medication access programs, and a variety of referrals to community programs. Patients can include individuals with temporary immigration statuses, such as a visitor visa, a student visa, or a work permit.
